Delivering first-class service before, when and after a claim is made

Before

- We invest time to get to know your customers and what is important to them. Then we utilise joined-up thinking, involving everyone from underwriters to claims handlers through to risk managers at pre-tender stage. This allows us to explore the full range of our capability and be fully prepared
- Even before any incident occurs, we'll meet with you and your customer to gather information and intelligence.
- This allows us to run scenario tests on how we'll respond and work in collaboration. With this in place, your customer can rest assured that we're ready to go in the event of a claim
- The Claims Account Management (CAM) team will work closely with you to understand what is important so that we can deliver a tailored claims solution to improve the overall customer journey.

When

- Our Claims teams are focused on settling your customer's claims as quickly and as fairly as possible through processes like our express handling
- A nominated and experienced claims handler will take clear ownership of each claim from start to finish with rapid referral to the right experts and specialists from our knowledgeable in-house teams and extensive supplier network partners
- We operate to agreed service standards but with a tailored approach to each claim to meet the customer's needs.

After

- Discuss, together with the customer, how to avoid recurrence and agree how we can use the lessons learned from the claim to improve risk management and avoid future incidents
- You and your customers will have access to a suite of Management Information to help show the profile of claims across their business
- We analyse claims history to identify trends and share this information with you and your customers.
